

GLP-1 TRACKING SERIES

Fitness & Step Companion

Weekly strength-cardio splits, recovery notes, and a cooldown timer graphic

Thirty-two undated weeks · 6 × 9 in

Undated · Personal use · Not medical advice

A note before you begin

This journal is a personal tracking and management tool only. It is not medical advice, diagnosis, or treatment, and it is not a substitute for care from a licensed clinician. It is not affiliated with, endorsed by, or sponsored by any medication manufacturer or healthcare brand. Do not start, stop, or change a medication, meal plan, or activity based on this book. Record only what your own prescriber has directed. If you notice concerning symptoms, seek professional medical care promptly.

If you use a GLP-1 or similar medication (including semaglutide or tirzepatide programs), treat this book as a log of your own observations. Dosing, titration, missed doses, and side-effect decisions belong only to you and your prescriber. Exercise timing around injections is individual. The timer is a blank record, not a protocol.

Intention for this volume

How to use this journal

Plan on the left, log on the right

- Write a strength idea and a cardio/step idea you already know how to do. This is not a workout program.
- Log RPE (rate of perceived effort) 1-10. Protect recovery on low-appetite weeks.
- The ring is only for circling how many minutes you happened to wait. It is not advice to train or to wait.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.

RPE	1 easy · 5 moderate · 10 all-out
Timer ring	Personal record of minutes, not a medical wait time

Where I am starting

Movement I enjoy enough to repeat

Step range that feels human

Rest-day rule I can keep
