

WELLNESS TRACKING SERIES

Migraine Weather & Trigger Diary

*Episode pages with pain maps, aura checklists, barometric fields,
monthly dashboards*

Seventy-two episode pages · twelve monthly dashboards · 6 × 9 in

Undated · Personal use · Not medical advice

A note before you begin

This journal is a personal tracking and management tool only. It is not medical advice, diagnosis, or treatment, and it is not a substitute for care from a licensed clinician. It is not affiliated with, endorsed by, or sponsored by any medication manufacturer or healthcare brand. Do not start, stop, or change a medication, meal plan, or activity based on this book. Record only what your own prescriber has directed. If you notice concerning symptoms, seek professional medical care promptly.

This journal is a personal tracking and management tool. It is not treatment, therapy, or a diagnosis. It does not replace a clinician, counselor, pelvic-floor physical therapist, registered dietitian, or other licensed professional. Sudden 'worst headache of my life,' weakness, vision loss, fever, or a changed pattern needs urgent medical care — not a diary entry.

How to use this journal

Log the episode while it is still true

- Mark the head map with one or two spots. Score peak pain 0-10.
- Copy pressure and weather from any weather app. You are looking for clusters, not proving a theory.
- Monthly dashboards turn scattered episodes into something you can show a clinician.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.

Pain 0-10	0 none · 10 worst imaginable
