

RANGE BAND PRESS

GLP-1 TRACKING SERIES

Side-Effect & Symptom Diary

Weekly adverse-event checklists, severity sliders, and visit-prep pages

Live inside the range.

Thirty-six undated weeks · 6 × 9 in · Grayscale interior

Undated · Personal use · Not medical advice

A note before you begin

This journal is a personal tracking and management tool only. It is not medical advice, diagnosis, or treatment, and it is not a substitute for care from a licensed clinician. It is not affiliated with, endorsed by, or sponsored by any medication manufacturer or healthcare brand. Do not start, stop, or change a medication, meal plan, or activity based on this book. Record only what your own prescriber has directed. If you notice concerning symptoms, seek professional medical care promptly.

If you use a GLP-1 or similar medication (including semaglutide or tirzepatide programs), treat this book as a log of your own observations. Dosing, titration, missed doses, and side-effect decisions belong only to you and your prescriber. This diary does not diagnose. Worsening or severe symptoms require clinical care, not a journal entry.

How to use this journal

Weekly rhythm

- Left page: score each observation 0-5 for each day. Leave a cell blank if you did not notice it.
- Right page: capture what helped, what aggravated, and anything you want on the next clinic list.
- Every four weeks, fill a visit-prep page even if you do not have an appointment yet — it keeps the story linear.

Be specific, not dramatic

- Timing matters: note whether nausea clustered after injection day, after a high-fat meal, or on an empty stomach.
- Do not change your dose because of a pattern you see here. Bring the pattern to your prescriber.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.

0-5 severity	0 none · 3 interrupts the day · 5 worst I have had
Flagged days	Circle weekday pills for days you want to discuss
Visit prep	A one-page brief for your clinician, not a diagnosis form

Where I am starting

Current dose I was prescribed (record only)

Known sensitivities I already have

My clinician's contact / portal notes

The single symptom I most want to understand
