A note before you begin

This journal is a personal tracking and management tool only. It is not medical advice, diagnosis, or treatment, and it is not a substitute for care from a licensed clinician. It is not affiliated with, endorsed by, or sponsored by any medication manufacturer or healthcare brand. Do not start, stop, or change a medication, meal plan, or activity based on this book. Record only what your own prescriber has directed. If you notice concerning symptoms, seek professional medical care promptly.

This journal is a personal tracking tool. It is not therapy, diagnosis, or treatment. Seek urgent care for chest pain, fainting, thoughts of harm, or a sudden change you cannot explain. Loud snoring, witnessed apneas, chest pain, or falling asleep while driving need a clinician.

How to use this journal

Fill it in the morning

- Bed time, how long to fall asleep (latency), times you woke (WASO), rise time, how you feel.
- Wind-down: screens, caffeine, alcohol as you already use them — copy, don't start a protocol from a book.
- Weekly page looks for pattern, not a grade.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.

Latency	Minutes to fall asleep, guess honestly
WASO	Wake after sleep onset, minutes
