

RANGE BAND PRESS

WELLNESS TRACKING SERIES

Postpartum Core & Pelvic-Floor Recovery Planner

*Six-week daily pages plus weeks 7-12: PT homework ticks, mood, stitches
care, support prompts*

Live inside the range.

Not an exercise program · 6 × 9 in

Undated · Personal use · Not medical advice

A note before you begin

This journal is a personal tracking and management tool only. It is not medical advice, diagnosis, or treatment, and it is not a substitute for care from a licensed clinician. It is not affiliated with, endorsed by, or sponsored by any medication manufacturer or healthcare brand. Do not start, stop, or change a medication, meal plan, or activity based on this book. Record only what your own prescriber has directed. If you notice concerning symptoms, seek professional medical care promptly.

This journal is a personal tracking and management tool. It is not treatment, therapy, or a diagnosis. It does not replace a clinician, counselor, pelvic-floor physical therapist, registered dietitian, or other licensed professional. This is not a physiotherapy protocol and contains no QR workout videos. Do not begin core or pelvic-floor loading until your own clinician has cleared you. Heavy bleeding, fever, calf pain, chest pain, shortness of breath, or thoughts of harming yourself or the baby require urgent care.

If found, please return to

Intention for this volume

How to use this journal

Track the plan you were given

- Write the homework your pelvic-floor PT or obstetric clinician assigned. Tick only those items.
- Stitches / incision notes are for what you were taught to do (clean, air, position), not new medical steps.
- The partner prompt exists because recovery is logistical. Ask for one concrete thing.
- Weeks 7-12 are lighter on purpose. Healing is not a six-week cliff.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.

Assigned item lines	Copy from your PT sheet
Mood 1-10	A check-in, not a diagnosis of postpartum depression

Baby sleep (rough)

Only movements and checks your own clinician / pelvic-floor PT has cleared.

PT homework I was given (tick if I did the assigned items — not extra)

☐ Assigned item 1:

☐ Assigned item 2:

☐ Assigned item 3:

☐ Assigned item 4:

☐ Assigned item 5:

☐ Assigned item 6:

Body notes (tracking, not diagnosing)

☐ Bleeding

☐ Stitches / incision

☐ Pelvic pressure

☐ Leak with cough

☐ Back / SI

☐ Headache

☐ Mood dip

☐ Anxiety spike

☐ Feverish

☐ Breast / chest

☐ Bowel

☐ Other

Stitches / incision care I was already taught (what I did today)

Partner / support prompt (what I needed, what I asked for, what landed)

.....

.....

.....

Red-flag: heavy bleeding, fever, chest pain, or thoughts of harm. Call emergency / your clinician now — do not wait to journal it.

54

POSTPARTUM RECOVERY PLANNER

Week 6 review

What felt stronger or quieter

What still needs a clinician

Support that worked

One ask for next week

Optional QR / URL from my PT

Paste only a link your own clinician sent. This book has no videos.
