A note before you begin

This journal is a personal tracking and management tool only. It is not medical advice, diagnosis, or treatment, and it is not a substitute for care from a licensed clinician. It is not affiliated with, endorsed by, or sponsored by any medication manufacturer or healthcare brand. Do not start, stop, or change a medication, meal plan, or activity based on this book. Record only what your own prescriber has directed. If you notice concerning symptoms, seek professional medical care promptly.

This journal is a personal tracking and management tool. It is not treatment, therapy, or a diagnosis. It does not replace a clinician, counselor, pelvic-floor physical therapist, registered dietitian, or other licensed professional. Flares, fever, chest pain, or sudden neurological change need clinical care. Do not adjust immune-modulating medication from a paper journal.

How to use this journal

Spoons are a budget, not a personality test

- Tick how many spoons you have at the start of the day. Write how many you spent. This is pacing, not a dare.
- Shade 0-5 for each observation. Blank means you did not notice it.
- Copy medications from the label. The gratitude line is one true thing, not a toxic-positivity tax.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.
