

GLP-1 TRACKING SERIES

Maintenance-Phase Tracker

Twelve undated months of range bands, refill reminders, and relapse-risk notes

Weekly pages inside each month · 6 × 9 in

Undated · Personal use · Not medical advice

A note before you begin

This journal is a personal tracking and management tool only. It is not medical advice, diagnosis, or treatment, and it is not a substitute for care from a licensed clinician. It is not affiliated with, endorsed by, or sponsored by any medication manufacturer or healthcare brand. Do not start, stop, or change a medication, meal plan, or activity based on this book. Record only what your own prescriber has directed. If you notice concerning symptoms, seek professional medical care promptly.

If you use a GLP-1 or similar medication (including semaglutide or tirzepatide programs), treat this book as a log of your own observations. Dosing, titration, missed doses, and side-effect decisions belong only to you and your prescriber. Maintenance ranges should be set with your clinician. This book only records them.

Intention for this volume

How to use this journal

Range, not a daily trial

- Open each month by writing the weight band you and your care team agreed on. Track the week's range, not a courtroom weigh-in every morning.
- Four weekly pages, then a close-out. Use refill and lab lines so logistics do not ambush you.
- Relapse-risk is about patterns (travel, skipped meals, all-or-nothing days), not moral failure.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.

Range band	Lower and upper bounds you already chose with a clinician
Relapse-risk slider	How wobbly the week felt, 1-5

Where I am starting

Agreed maintenance range

Waist / clothing baseline

Refill cadence I was given

Early warning signs that I am slipping into all-or-nothing

BEGIN

Twelve months

A quieter kind of tracking.

Weight range band (not a daily verdict — a band you and your clinician agree on)

Relapse-risk reflection (travel, stress, missed doses, all-or-nothing thinking)
