

GLP-1 TRACKING SERIES

Meal & Satiety Journal

Daily two-page spreads for protein, fiber, hunger, and non-scale victories

Eight undated weeks · 6 × 9 in · Grayscale interior

Undated · Personal use · Not medical advice

A note before you begin

This journal is a personal tracking and management tool only. It is not medical advice, diagnosis, or treatment, and it is not a substitute for care from a licensed clinician. It is not affiliated with, endorsed by, or sponsored by any medication manufacturer or healthcare brand. Do not start, stop, or change a medication, meal plan, or activity based on this book. Record only what your own prescriber has directed. If you notice concerning symptoms, seek professional medical care promptly.

If you use a GLP-1 or similar medication (including semaglutide or tirzepatide programs), treat this book as a log of your own observations. Dosing, titration, missed doses, and side-effect decisions belong only to you and your prescriber.

Intention for this volume

How to use this journal

What this book is for

- Use one two-page spread per day. Left page captures meals, hunger, and injection timing. Right page captures totals, satiety notes, and a non-scale victory.
- Fill in numbers your clinician already gave you (protein targets, injection day). This book does not set those numbers.
- Hunger scales are 1 (none) to 10 (strongest). Fullness after eating uses a shorter 1-5 row so it stays honest and quick.

How to stay consistent

- Write during or just after the meal — memory is a poor satiety instrument.
- If a day is messy, still tick water and protein. A half-filled page is more useful than a skipped one.
- At the end of each week, complete the recap before starting the next seven days.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.

Hunger 1-10	1 none · 5 moderate · 10 strongest urge to eat
Fullness 1-5	1 still hungry · 3 satisfied · 5 uncomfortably full
Site boxes	Mark the injection site you actually used, then rotate as directed
NSV	Non-scale victory: energy, clothing, labs, mood, social ease

Where I am starting

Protein target my clinician or dietitian suggested (g / day)

Fiber target I am aiming for (g / day)

Injection day(s) and time window I was given

What 'satisfied' feels like in my body, in my own words

Non-scale victories I care about more than a single weigh-in
