How this journal works

Wave strips

- Plot each reading as a point on the wave, not a standalone number. Waves show rhythm; numbers show instants.

Exertion windows

- Tick what you did and for how long. The window is context that numbers alone lose.

Twelve-week trend

- One line per week. The trend is for your clinician, not for you to interpret.

Marks & scales

Use these marks consistently so patterns are easy to see later — and easy to share with your care team.

One honest thing I already know:

One thing I want the record to show:

Where I want to be in 30 days:

One rule I am setting for myself:
